

# BLUE WHALE MESSAGE

*As a species, the Whales are the most ancient spiritually and intellectually evolved Souls. In our world the Whales anchor the Light beamed to Mother Earth from distant sources. The Whales communicate with off world intelligent Celestial Beings who are in stewardship and service to Mother Earth and her inhabitants. The Whales create a resonance in their heartbeat that corresponds and communicates with the very essence and consciousness of our planet and the Being of Light we know as "Gaia". After five hundred million years of existence on this planet they have both knowledge and experience of how to work effectively with the other conscious energies of the planet, solar system and the galaxy.*

*They use their living Light fields or "Merkaba" to balance, synchronize and heal themselves, the planet, and others who express the desire for their expertise. They invite you to experiment with their "healing energies" in your personal lives and open to their communications.*

In their communication with other intelligent forces, the Blue Whales work to balance and harmonize the electromagnetic fields of Light in the oceans, that correspond to the longitude and latitude lines upon the Earth. The Blue Whales have shared that they function in their physical embodiments as neural-electricians for Mother Earth. As they swim north-bound in the oceans along the coast lines they use their innate abilities to connect to the magnetic fields of a given area. They then realign the magnetic fields of energy as needed to correspond to the star fields and other planets that are currently influencing the electro-magnetic fields of that area. They have said they are the physical "electricians" for the
