

Dolphins and DNA

The dolphins have shared with me that they are the designated keepers of the human DNA template system.

They receive infusions of DNA activations through the earth's ocean systems from Creator. It is their given task to process this information internally and calibrate the actual DNA that is perfect and right for each person.

They also hold the energy of love and joy for actual locations on the planet that are experiencing war and chaos. They work to create frequencies that are infused into these areas on the planet with templates of peace, harmony and healing.

The dolphin matrix supports DNA re-encodements for people and places through the energy code systems they use. The dolphin family of light has created a template for human DNA and uses it to monitor the overall template for the pure holographic possibility equation for humanity and Earth.

If you choose to connect with the planetary dolphin family, you can receive these attunements directly from the dolphin group consciousness.

They are the masters of DNA recalibration and are able to shift old energies very quickly with their healing frequencies. They work in a frequency of joy and playfulness perfectly suited to the energy of ascension and the "new Earth."

Beloved humans, please listen to your hearts as the energies continue to accelerate. Call upon the dolphin energies as they are the chosen emissaries of light. Their communications will be valuable assistance in helping you align with the crystalline grid system, your personal DNA upgrades and the dolphin matrix systems that are assisting in creating the "center" for the new Earth.

Know that the dolphin matrix of energy is assisting with cleansing and balancing the Earth's oceans.

Currently, many scientific experts are saying that DNA plays a powerful role in newly discovered communications between dolphins and humans. Ongoing study at the Sirius Institute in Hawaii reveals that dolphins and whales receive and transmit sound signals capable of affecting the genetic double helix. Using natural biotechnology, dolphins can actually heal humans swimming near them "sonogenetically" with sound waves, as many people have attested.

For the last 14 years, multidisciplinary study at the Sirius Institute has indicated that the expression of DNA traditionally considered the blueprint of life can be changed by the sound and electromagnetic fields generated by dolphins. New research shows that our DNA is activated by waves and particles of energized sound and light that literally switch genes on or off.

Likewise, genetic inheritance is energetically transmitted bio-acoustically and electromagnetically through special water molecules that form the electro-genetic matrix of DNA. These hydroelectric structures are shaped like pyramids, hexagons and pentagons and they direct healing processes.

This amazing phenomenon explains how remarkable healings have been reported by people in whale- and dolphin-watching

boats when dolphins are swimming next to them and by swimmers following contact with dolphins.

The cetaceans have had complex languages for millions of years. They have the largest brains on the planet. Visitations by dolphins and whales have demonstrated a history of friendship and cooperation and even partnership with humans.

The dolphins and whales have shown us that they are the ancient and wise super-sentient beings on this planet. They are living examples for us, showing us how to live in peace and in harmony with our planet.

We encourage you to connect with dolphins and whales each and every day, energetically, telepathically and in the physical oceans whenever you can. They are the living ultimate expression of how we can begin to live in our hearts within the "pod mind," which is demonstrated by living for the good of the many, not the one.
